Aircraft Data Management Leasing

UTC Aerospace Systems, one of the world's largest suppliers of technologically advanced aerospace products, introduces an innovative approach to financing our Aircraft Data Management solutions.

Our leasing packages are tailored to meet the needs of our customers, eliminating large capital expenditures, maintaining cash reserves, and keeping bank lines open for new projects in your budget.

With the leasing services program from UTC Aerospace Systems, our customers have a strong and proven partner in connected aircraft solutions.

Benefits of Leasing

- Maximize capital expenditure
- Launch ADM solution with operational budget
- Flexible path for lease renewal or ownership
- Enable real-time access to aircraft data to improve safety, situational awareness and operational efficiency—all in a single, easy to manage, monthly invoice
- Fully deploy your integrated ADM system, including mobile- and AID-hosted apps, services, and hardware while minimizing up-front capital investment
- Realize near-term ROI with a package tailored to your business needs and that offers flexible lease options
- Benefit from the industry's leading ADM platform and robust STC portfolio
- Take advantage of UTAS's ADM ecosystem, including a Software Development Kit (SDK) and best-in-class partner offerings

Where ingenuity takes off ™

UTC Aerospace Systems

Aircraft Data Management Leasing

Flight Operations

OpsInsight™ Electronic Flight Folder

Navigation and charts (supported)

Electronic Tech Log (eTechlog) (supported)

Real-time weather data (supported)

Technical Operations

OpsInsight™ Aircraft Condition Monitoring System (ACMS) reports

OpsInsight™ Virtual Quick Access Recorder vQAR)

OpsInsight™ Aircraft Data Loader

Airline Operations

OpsInsight™ Flight Tracking

OpsInsight™ Web Portal/Ground Station

Communication outage mitigation

OpsInsight™ Route Optimization

Predictive maintenance and Prognostic Health Monitoring (PHM)

Aircraft Data Management Platform: Applications, Services & Hardware

Value Proposition

Improve Flight Safety & Customer Experience

- Enhanced situational awareness with real-time data exchange
- Adjust in-flight route to account for emergent weather

Save Money: Time, Fuel & Labor

- Improve turnaround time at gate
- Improve fuel burn and on-time performance
- Minimize unscheduled maintenance
- Reduce labor cost via electronic workflows and process automation
- Enable ACARS over IP

STC Portfolio

- Currently available: 717, 737, 747, 767 and 777; A320, A330 and A340

Additional Benefits

Implement Common Solution Across Mixed Fleets

- Provide common flight crew training
- Rationalize spares pool
- Standardize data exchange interface with aircraft via OpsInsight portal
- Secure communications on and off the aircraft

Supports Best-in-Class Mobile and Hosted Apps

- Adopt OpsInsight™ applications: ACMS Lite, Electronic Flight Folder, Virtual Quick Access Recorder, Data Loader
- Provide a connected platform for partner applications, including real-time weather, navigation charts and eTechlog
- Develop in-house applications for your operations using our Software Development Kit (SDK)
